

UNITED STATES OF AMERICA  
CIVIL AERONAUTICS BOARD  
WASHINGTON, D.C.

Civil Air Regulations Amendment 3-12

Effective: May 18, 1954

Adopted: April 13, 1954

**AIRPLANE AIRWORTHINESS: NORMAL, UTILITY, AND ACROBATIC CATEGORIES**

**MISCELLANEOUS AMENDMENTS**

A study of the administrative portions of Part 3 of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the Part, § 3.0, and those regulations that are applicable to the issuance of and change to a type certificate. It also makes several other minor changes.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 3.11, apply not only to a new airplane type for which application for a type certificate is made but also to any type irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type airplanes but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the airplane need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which defines those changes in an airplane type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 3.12, 3.13, and 3.19, also include minor changes for purposes of clarification. In addition to the proposed changes to the administrative provisions of Part 3, two other changes are being made with respect to combustion heaters and fire precautions for cabin interiors (§ 3.388), which are considered minor in nature.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 3 of the Civil Air Regulations (14 CFR, Part 3, as amended) effective May 18, 1954:

1. By amending § 3.0 to read as follows:

**3.0 Applicability of this part** This part establishes standards with which compliance shall be demonstrated for the issuance of and changes to type certificates for normal, utility, and acrobatic category airplanes. This part, until superseded or rescinded, shall apply to all airplanes for which applications for type certification under this part were made between the effective date of this part (November 13, 1945) and March 31, 1953. For applications for a type certificate made after March 31, 1953, this part shall apply only to airplanes which have a maximum weight of 12,500 pounds or less.

2. By amending § 3.11 to read as follows:

**3.11 Designation of applicable regulations** The provisions of this section shall apply to all airplane types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the airplane shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for a type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications

pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment to this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to a type certificate (see § 3.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 3.13(c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the airplane, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 3.13(c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of an auto-pilot or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines;

(2) A change in engines employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending § 3.12 to read as follows:

3.12 Recording of applicable regulations The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 3.11.)

4. By amending § 3.13(b) by deleting the parenthetical reference “(See also § 3.11 (a).)” at the end of the paragraph.

5. By amending § 3.13 by adding a new paragraph (c) to read as follows:

3.13 Type certificate \* \* \*

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 3.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 3.19 to read as follows:

3.19 Changes in type design For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 3.11 (d) and (e), and Part 1 of this subchapter.)

7. By amending § 3.388 (a) by deleting the second sentence and inserting in lieu thereof the following: "In compartments where smoking is to be permitted, the wall and ceiling linings, the covering of all upholstery, floors, and furnishings shall be flame-resistant."

8. By amending § 3.88 (b) to read as follows:

3.388 Fire precautions \* \* \*

(b) Combustion heaters If combustion heaters are installed, they shall be of an approved type. The installation shall comply with applicable parts of the powerplant installation requirements covering fire hazards and precautions. All applicable requirements concerning fuel tanks, lines, and exhaust systems shall be considered.

(Sec. 205(a), 52 Stat. 984; 49 U.S.C. 425(a). Interpret or apply secs. 601, 603, 52 Stat. 1001, 1009, as amended; 49 U.S.C. 551, 553)
